

2014 RESIDENTIAL ELECTRIC WATER HEATER REBATE

RESIDENTIAL ELECTRIC WATER HEATING	
Resistance***	Integrated Equipment, Stand Alone Heat Pump Water Heater, or Desuperheater***
\$100	\$100

*** Water heater must be a 40 gallon unit or larger and load management is required for at least three years. Water heater credits will be awarded at 100% for the first unit installed and 50% for each additional unit installed. When more than one water heater is installed, control is required on each unit to qualify for the additional rebate.

Rebates are for new equipment, equipment conversion from fossil fuel or replacement of electric equipment to a more efficient unit.

A receipt showing proof of purchase must accompany each application form. Rebates will be issued as a credit on a Beatrice Board of Public Works customer's account, not as a check.
